

Evan Conway

evanjayconway@gmail.com | evanjayconway.com | github.com/evan-conway

EDUCATION

Carnegie Mellon University

Master's in Machine Learning

Pittsburgh, PA

Expected August 2026 - December 2027

University of Virginia

Bachelor of Arts in Computer Science, Mathematics

Charlottesville, VA

August 2023 - May 2026

- GPA: 4.00
- Echols Scholar (top 5% of incoming class)

EXPERIENCE

Palantir Technologies

Backend Software Engineering Intern

May 2026 – August 2026

New York, NY

- Working on large-scale capacity management for LLMs

Collaboration with Terence Tao

Independent Mathematical Researcher

April 2025 – June 2025

Remote

- Researched the Guy-Selfridge conjecture with Fields medalist Terence Tao
- Work successfully resolved the Guy-Selfridge conjecture, along with several other related open problems
- Published paper preprint (coauthored with Tao), *Decomposing a factorial into large factors*, currently under review in *Mathematics of Computation*. For more information, see Terence Tao's [writeup](#) of the project

Navy Center for Applied Research in Artificial Intelligence

Artificial Intelligence Research Intern

May 2024 – August 2025

Washington, DC

- Developed a novel probabilistic planning algorithm, Plan-Orchestrated Tree Assembly for Lookahead (POrTAL), increasing task completion speed by up to 1.25x on average compared to the best existing algorithms
- Published paper preprint, *POrTAL: Plan-Orchestrated Tree Assembly for Lookahead*, currently under review for *IROS 26*
- Designed an improved probabilistic planning algorithm for [Polaris](#), a cutting-edge robotic planning system, increasing task completion speed by up to 2.68x on average
- Wrote a non-archival workshop paper, *Lightweight Probabilistic Planning with Macro Actions*, accepted to the 2024 AAAI Fall Symposium

UVA Department of Mathematics

Independent Mathematical Researcher

March 2024 – January 2025

Charlottesville, VA

- Discovered a general formula and asymptotics for the areas of (sn, n) -Dyck paths
- Work resulted in a paper, which is currently being prepared for submission

VICTOR Lab

Robotics Research Intern

June 2022 – August 2023

Charlottesville, VA

- Built vision-based facial and gesture recognition system for a humanoid robot, deployed in industry-sponsored project (THK)
- Improved underwater robot simulation in USDA-funded collaboration with multiple universities

TECHNICAL SKILLS

Languages: Python, C/C++, Java, CUDA

Developer Tools: Git, Docker

Libraries: PyTorch, NumPy, Hugging Face, wandb, Sklearn, OpenCV, ROS
